## PERSONAL PROJECTS

**photography website :-** This project is an excellent example of a photography portfolio website keeping photos front and center. The website is clean, with the homepage divided into two columns. The main section showcases his works, whereas the left column helps visitors navigate different parts of the website - work portfolio in a particular sector, the ecommerce store where he sells portraits, about page, contact page, etc

**ice-cream shop-website :-**The project for ice-cream-shop Website is clean and simple. The design uses a lot of white space, which makes the site easy to navigate. The menu is easy to find and the products are clearly laid out. The overall design is modern and stylish.

**Tour And Travel :-** This project are create using React javascript libery. This islanding page design for a Travel agency company an engaging and intractive user experice in a dark aesthetic style for a travelling company.

**Interior Design :-** This project are create using wordpress. This is templates page design for home and office. To give you a better understanding of what interior designing is all about.
